Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's cooperation is requested in correcting any error of which applicant may become aware in the specification.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The information disclosure statement submitted on 12/05/2003, has been considered by the examiner and made of record.

See attached form PTO-1449.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Russell et al. (6,631,234).

The Russell et al discloses in figure 7, a method of a fiber coupler comprising steps of:

- providing at least a first fiber (260) and a second fiber (270) and stacking two fiber together for forming a stacking region; and
- fusing the stacking region through an electric arc for forming the coupler and cleaning the stacking region.

With regard to claims 1 and 7, the Russell et al reference discloses all the steps of method. See column 1, lines 15-20.

Allowable Subject Matter

5. Claims 2-6, and 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The Russell et al reference does not disclose the steps of forming the evanescent field exposed surfaces of first and second fibers. This characteristic of the method is critically, since the evanescent wave coupling method will reduce the optical loss.

Claims 11-18 are allowed. The Russell et al reference does not disclose a manufacturing apparatus of a fiber coupler having at least two fibers comprising a pedestal; at least a fixing unit; a discharging unit located on the pedestal..., as discloses in claim 11.
